Dynamic Pro, Inc

Capabilities Statement

Dynamic Pro, Inc. (DPI) is a consulting firm with strong focus in management consulting, technology, and business services. We offer a multidisciplinary team that builds relationships, delivers quality products, and represents the client's best interest.

DPI's approach addresses the three dimensions of change: People, Process, and Technology. We offer a comprehensive toolkit of approaches to help clients adapt to rapid changes in their mission environments. Adapting to change often requires more efficient processes, better governance structures, and renewed emphasis on accountability and results. Our approach to program management helps high performing organizations integrate planning, implementation, and control activities using Project Management Body of Knowledge (PMBOK) methodologies.
